

# The 15-Minute AI Visibility Audit for B2B Startups

*Can AI Find You?  
Follow the steps below to find out!*

## Your 3-Step AI Visibility Audit

### Ask the Right Questions

Open ChatGPT and/or Perplexity (or any other LLM) and try these prompts:

1. Who are the top startups helping [your industry] solve [your problem]?
2. What companies offer [your product type]?
3. What are alternatives to [your company name]?

*If your startup doesn't appear, it's invisible to AI search and it's time to fix that!*

### Important!

Use temporary chat or incognito mode for your searches!

### Check Your Digital Footprint

Next, ask ChatGPT and/or Perplexity (or any other LLM) the following questions:

1. Where can I learn more about [your company name]?
2. What's being said about [your company name]?

*If the results are only your own site or social media, AI has no external proof your business exists.*

### Make a Quick Fix

Pick one key page like your homepage or product page:

1. Add a clear and simple "about" sentence.
2. Link to a credible external mention if possible
3. Update/optimize your LinkedIn company and personal pages.

*These simple steps can strengthen your brand's authority signals fast.*

## Book a Free AI Visibility Consultation

Understand where your startup stands in AI search and what's possible with a full visibility audit and plan.
